BIGGIE

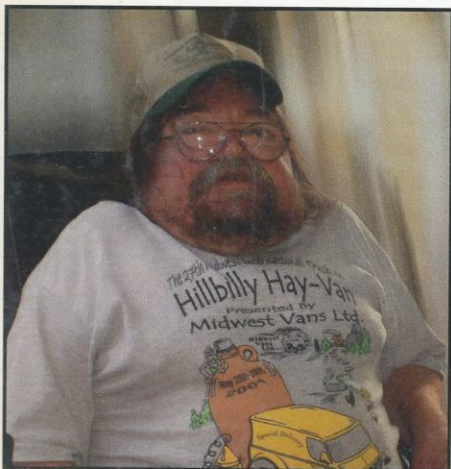

Easy Liv'n Vans
Chicago

1952-2008

just for your info...he died from respiratory failure brought on by his lifelong battle with dwarfism. When he was young, doctors gave him only a slight chance to survive past the age of 6. I am sure you have seen him around...usually with Rudar or Tom and Laure, either on a golf cart or in a wheelchair. I'll get a pic for the book...

Also here is the complete list of our club members. George and Game and I are working on more info for you.
